## PILU-LAND

**2** PILU-LAND

Station number 2 is hidden somewhere in the PILU-LAND. To make sure you guess the right answer to the question, read the legend of the cooper who was saved by a dragon.

**Have you got the right answer? Then enter the corresponding letter in position 2 of the secret word.**

## LEDGEND OF THE «SAVED BY THE DRAGON»

"It was autumn. A cooper wanted to make new barrels for the bountiful fruit harvest. He went looking for rods for his barrel hoops on Pilatus. For a brief moment, he didn't look where he was going and fell into a deep cave. At first, it was so dark that he couldn't identify anything. Suddenly, to his left and right, he recognized the outlines of two dragons. He was terribly frightened! But the dragons didn't harm him. However, the cooper also noticed that there was no way he could escape from the cave. It was too deep. As well as being scared, he was now also hungry. He noticed that the dragons always licked a particular stone. So throughout the winter, he copied them. As the snow slowly melted, one of the dragons crawled to the exit of the cave and held his tail out to the cooper. The it pulled him out of the cave. The cooper returned home safe and sound. As a thank you, he had a chasuble embroidered. The chasuble still exists today. It is in the possession of the collegiate church of St. Leodegar in Lucerne."

## DRACHENALP

**5** DRACHENALP

So, did you treat yourself to a flight with the Dragon Glider? If you didn't... you can continue by foot to the Drachenalp. That is where station 5 of the Dragonchallenge is hidden.

Did you find the board with the question? Great! So you now know that you can take your time here to read the legend of the Pilatus ghost.

**You will then have no problem entering the right letter in position 5.**

## LEGEND OF THE «PILATUS GHOST»

"Many centuries ago, Pilatus was battered by raging storms. The people of Lucerne were afraid. They believed that it was the fault of Pontius Pilate, who was buried in Lake Pilatus. He was buried here because there was no suitable place for him anywhere else. Ever since, the mountain had been populated by howling ghosts and flying cows. Time and time again, doctors and scientists reported fire-spitting dragons. Then 450 years ago, a pastor and a couple of people from Lucerne built up the courage to go to Lake Pilatus. They threw stones into the water, crossed the lake and the ghost remained quiet. The spell was broken! Pilatus owes its name to this myth. Before that, it was called Fractus mons – meaning broken mountain."

## OBERHAUPT

**8** OBERHAUPT

And now? Out into the fresh air! Enjoy the endless view. A good place for this is on the Oberhaupt. Up there, you will not only find a spectacular view but also station number 8.

**So, did you pay close attention to the geography lesson? Then finding the answer will be child's play! Enter your letter in position 8.**

## LEGEND OF THE «MONDMILCHLOCH»

"Mysterious things happen on Mount Pilatus. Do you know the Mondmilchloch? It is on the southern edge of the Widderfeld. It is where rock milk comes from. This was famous as a remedy far beyond the national borders. The rock milk was most powerful when it was collected from the cave while saying the name of the person who was ill. It was said to heal wounds, relieve stomach pains and help bleeding stop. There was a thriving market for rock milk. Until other mountain regions discovered the business for themselves and sold their own rock milk."
